

# 2

## Kit 2: Temperature

### Circuit:

### Steps:

1. Go to Menu, Programming, Python 3 and then File, New File.
2. Press CTRL+S on your keyboard.
3. Save it as 2-temperature.py
4. Type:

```
from edupy import *  
  
temperature()
```
5. Press CTRL + S on your keyboard.
6. Press F5 on your keyboard.
7. Your program will now run. Press CTRL+C to stop it running.
