

3

Kit 1: User Input

Circuit – Same as card 2:

Steps:

1. Go to Menu, Programming, Python 3 and then File, New File.
2. Press CTRL+S on your keyboard.
3. Save it as 3-userinput.py
4. Type:

```
from edupy import *  
  
user_input()
```

5. Press CTRL + S on your keyboard.
6. Press F5 on your keyboard.
7. Your program will now run. Press CTRL+C to stop it running.
