

# 3

## Kit 3: Line Detector

### Circuit:

### Steps:

1. Go to Menu, Programming, Python 3 and then File, New File.
2. Press CTRL+S on your keyboard.
3. Save it as 3-line detect.py
4. Type:

```
from edupy import *  
  
forward()  
sleep(1)  
backward()  
sleep(1)  
turn_left()  
sleep(1)  
turn_right()  
sleep(1)
```

Print off testline.pdf for a line to test.

5. Press CTRL + S on your keyboard.
6. Press F5 on your keyboard.
7. Your program will now run. Press CTRL+C to stop it running.
